

KEEP the NO CALL LIST - Reasons: 1. I do not appreciate being needlessly disturbed by whoever at anytime they feel like about something I do not want or need. 2. We have 3 elderly relatives who do not need this type of calling as they either can't hear well enough or they just like to be able to talk to anyone nor can they afford it. 3. We observed one of our parent's answer the phone and the telemarketer started their spiel and were told they were not interested and before they got done with the parent, they had broken down their resistance and had talked them into accepting whatever it was they offered! (This parent is the sharpest of the three older people we are concerned about.) 4. If we want something, we will take the initiative. Telemarketers turn us off completely and even if we were interested in their products or service, we do not subscribe to it if they have called us without our permission! WE NEED CONTINUED TELEMARKETING BANNED NATIONWIDE. It is preying on too many innocent people.
